

Hexagon adaptors and flat electrodes

Hexagon adaptors

PW hexagon adaptors are widely used in standard machines, manual weld gun and robot gun applications.

Manufactured from 26mmAF material, the standard thread is 1/2" BSP, but PW also make the identical range with M22 threads, as used widely in EU factories.

Lengths range up to 250mm

Tapers to accept 1/2", 5/8" and 3/4" BS807 as standard, with Morse and ISO tapers available on request.

Hexagonal flat electrodes

Giving a large surface area, these can be used for many spot weld applications

They can also be supplied with Elkonite faces for projection welding dies.

26mm AF chrome copper

Tapers available 1/2", 5/8" and 3/4" BS807
