

Heavy Duty Portable Welding Guns

The "400 Series" range of weld guns improves on the world-wide standard for excellence established by PW over the last 10 years. Many thousands of PW guns are installed, and operating 18 shift weeks in continuous production environments. The range of arms is limitless, as there are so many variations, but these guns will provide one of the most cost effective and long lived production tools available today.

(Specifications are representative of range – more variations are available)

MX-150 to 300 Scissor Guns	Arm centres	Stroke mm	Cyl force daN	AC or MF	kVA
